CHARITABLE PLEASURE.

One of the pleasant things of last year in connection with the Free Doctors' Fund was the way in which entertainments were gotten up for the benefit of the sick children. At one of the wellknown Summer resorts, whose proprietor is full of genial activity, a splendid sum was realized from one evening's bazaar.

In England they are always having sellers. Is this it? flower shows, fairs, or something of that kind for a charity. The swell ladies club together and make it a go. Some stray Princess of the numerous Guelph family is a patroness and shekels pour in.

Now why do not the fair and joyous ing that the Philadelphia is such a go? women, who are gathering health and happiness by the swelling waves of ocean or on the pure heights of wooded mountains, give a few days to getting up some entertainment to benefit the puny little things, who take the air at a fifth-floor brought them to straits-Behring straits, as it back window, as it thickly mounts up from the noisome area?

A scheme of this kind, with two or three popular ladies engineering it, can be the source of great amusement to all who work it up. To have a good time David, that cold, little cass, added one stone and confer a hanefit on suffering great more to his weight he couldn't stand it. and confer a benefit on suffering creatures by it is an action that ought to win the approval of everybody.

The interest shown in the little wards of humanity is encouraging-very encouraging. On with the good work!

THE YALE-HARVARD RACE.

New York had its first news of the great Yale-Harvard 'Varsity race from THE Senator Morril is described as a 'typical Ver-EVENING WORLD, which was the ONLY bis shining hat not forgetting a collar and cravat paper to print the result of the contest on like those always seen on the Green Mountain the day on which it occurred. An extra was upon the street within the briefest possible time after the race was rowed. Jamaica Plain, Mass. He takes exercise every giving the result, together with concise bulletins, to show the closeness of the struggle over the first two miles of the struggle over the first two miles of the Orleans at that time had 22 times as many incourse, and how Yale then pulled to the habitants as the Lake City.

was eagerly hailed with this looked for piece of news.

ANTHRACITE HEROISM.

There must be fine stuff in miners. Under their grimy skin glows the pure, dazzling splendor of devoted kindness and stanch heroism. Every disaster in a mine develops these noble qualities in those hardy toilers.

The Farm Hill mine horror, which is the latest to make the world shudder, has brought out in the noblest way this sense of sympathetic brotherhood. Slowly, Or a spoony young pair who don't talk of the of sympathetic brothermood. Hand a moon, and a moon, doggedly, eagerly miners have dug are rarer by far than a day in June.—(Airago Past through hundreds of feet to reach their companions on whom the earth had shut its pitiless inws. Even the faintest hope of rescuing the

the steadfast picks were working their in trembling lave I sent her mother flowers and remande into the mine, a column of fire beliebed from the mouth of the shaft.

Glory to these gallant, noble workers

Discussed the daily news and pointer.

At vast expense, exerted all my powers.

Carried for packages and held for shawi And tasked about dyshepona. Hours on hours amail victims alive has perished now. Just as despite their failure. They are ornaments to human nature.

BEITISH GOLD.

The invasion of American industries by British capital is to be deprecated. If we were a heavy lethargic race who were too indelent or too duli to sweep up the gold dust that drifts about our doors there would be an extenuation if not justification in these encroachments on our province of productive labor by alleas.

But even our worst enemy will not charge indolence on the American temperament. We are faultily energetic. Except the devil's, there is no more rest less activity than that of the strong-fibred American man of business.

W AYAD

Let Britons hold their own, then, but not usurp what is ours.

G00D !

All that is said about the new cruiser is greatly to her credit. The properly corestimate of her time puts it as knots. If this be true, she drops a gool \$200,000 into the pockets of her

All the city employees are entitled to the weekly payment. Why not? Is there any doubt that they work for a Corporation?

PLAYED IT ON THE CROWD.

An Old Trick, but New to the World's Fair Cityites.

A quiet young fellow emerged from one of our suburban hotels the other day, says the Chicago Times, and began poking in the sand, which is ancommonly thick just there, with his cane. Of course a bystander saw him, and asked what he

"I'm looking for a five-dollar gold piece," was the answer.

The questioner was interested, and, procuring a long stick, fell to digging also. A second man did likewise, and others followed suit, till at least forty in-

others followed suit, till at least forty in-dividuals had joined in the search. Umbrelias and canes and boot toes were brought into requisition, and stirred up the dust to such an extent that the sir resounded with a chorus of success, while the policeman nearly went distracted in his fruitless endeavors to disperse the crowd.
Finally some one remembered to ask
the quiet young fellow how he happened

the quiet young fellow how he happened to lose the coin.

"Oh, I didn't lose any," he replied, calmly, "I just thought I might find one if I looked long enough; that's all."

Then each separate member of that party of volunteer searchers went silently away and kicked himself, and the quiet young fellow sat down and smiled till he was red in the face.

HANSON TELLS HOW HE

well as he ever was in his life.

JOHN HANSON, NO. 7 MONROE STREET "My threat was choked up with muous which had dropped into it. I felt sick at my stomach and did not care for preakfast. Other I felt unable to go to work, but I had a family and I was compelled to work in order to support them. My ears were filled with ringings sounds, and I noticed I was growing deal. Sharp, shooting pains deried through my cleat, side and back, my head ached and I always felt tired and languid.

"I became one of the great number of Dra Copeland and Histr's patients. Now I have a different story to tell. When I came to them I did not be lieve they could cure me. It was just like a drowning man grasping at a straw. I was surprised as the low fees and the number of patients they had, I began to improve, and continued to de so, until I now feel as well as I have at any time to my life."

Speaking of THE WORLD'S Half-Rate Situation Days, it is well for employers to remember that on these days (Mondays 184 and Saturdays) "Wants" for 421 Help cost but one-half the regular rates and attract more people than could be reached by 113 ALL OTHER NEW YORK PAPERS COMBINED. Be-138 cause of this THE WORLD publishes on Mondays and Saturdays THREE TIMES AS

York paper.

P. T. BARNUM Writes a chapter of The Greatest Composite Novel, to begin in "The Evening World" next Monday, June

'Wants" as any other New

A GRASSHOPPER WATCH. An Ingenious Alarm Timepiece Made to imitate the Insect's Chirp. La Cigale (the grasshopper) is the name given to a new alarm watch. Mr. Riolet, who has made it, simply applied to his purpose an invention which, in the toy purpose an invention which, in the toy line, was very successful some years ago, asys a Paris letter to the Mansipacturing Jeweller. The noise produced by the new alarm is shrill and continuous, whereas in the toy, called cri.cri, it was slow.

The principle is this: If a sheet of hammer hardened steel, thoroughly plain, whose borders are caught within a frame has a lever fixed perpendicularly to a part of its surface; if, besides, the end of that lever is moved, then set free, as a result there will be a wibration conveyed to the steel sheet.

as a result there will be a vibration conveyed to the steel sheet.

The sound so obtained is a sharp smack produced by the sheet in striking the air. The pitch of the sound obtained by that means is in proportion to the size and thickness of the metallic sheets employed. In this new alarm watch we see, first, a hammer-hardened steel sheet caught in a circular frame or drum; second, a lever riveted on it, and third, a dented wheel acting on the lever.

When the wheel moves each one of its tech causes the sheet to vibrate, so that to obtain a maximum of sound, or notes, it is sufficient to well regulate the quickness of that wheel.

The alarm sufficiently reproduces the grasshopper's shrill singing to justify its maker in calling it "la cigale," and in having that insect chased in large size on the case.

One who Will Prosper.

[From the Jester.] Bobinson—Queer business that bankrupted f Wiggle's.

Jones-Remarkably fishy. What can you Johns Tennaram Land Marke out of it?

ilobiuson Me ! Nothing. But I fand that Wiggle will make considerable.
